Christmas 2021 Special

Understanding Myalgic Encephalomyelitis

We wish you a Merry Christmas and a Prosperous and Health New Year.

Due to a generous donation to Nightingale from a Quebec family charity, we are reducing the cost of **Understanding Myalgic Encephalomyelitis** from \$100 dollars Canadian to:

\$50 Canadian or Australian, \$40 US, €35, £29

* * *

NOTE: The third edition of **M.E. and the Return of Polio to the USA** is **FREE OF CHARGE** and will be released on the Nightingale Press website nightingalepress.ca for Christmas.

The hard copy will be in print in January and will probably cost:

\$30 Canadian or Australian, \$24 US, €21, £18

The importance of **M.E. and the Return of Polio to the USA** is that both **Polio and M.E. are** caused by the same family of enteroviruses. The treatment and blood diagnosis of both diseases should be the same. If you really wish to understand the diagnostic criteria and treatment of both Polio and M.E. it is essential that you read this small book. This is why this Nightingale's book is a free to download at nightingalepress.ca

Please circulate this message to patients and organization interest in the diagnosis & cure of M.E.

Our board & staff sends our best wishes for Christmas and 2022 to you and your family

Nightingale welcomes charitable donations.
